

Breast Screening

It is recommended that women discuss the benefits and limitations of screening mammography with their doctor. If screening is chosen:

✓	Age	Risk	Details	Referral
	30-74	High	At least one of the following: • BRCA1 or BCRA2 carrier, or untested 1st degree relative of carrier • Very strong family history (1) • Chest wall radiation at 10-30 yo Recommended every year	Yes - initial referral if < 40 yo
	40-74	Higher than average	1st degree relative with breast cancer Recommended every year	No
	40-49	Average	Available every 2 years	No
	50-74	Average	Recommended every 2 years	No
	75+	Average	Available every 2-3 years No recall will occur	No

1. (a) 2 cases of breast cancer in close female relatives (mother, sister, daughter, aunt, grandmother, or great-aunt) on the same side of the family, both diagnosed before age 50, or (b) 3 or more cases of breast cancer in close female relatives (mother, sister, daughter, aunt, grandmother, or great-aunt) on the same side of the family, with at least one diagnosed before age 50.
